

ANDREW KIBET RONO

Software Engineer | ERP Developer | Database & Systems Administrator

ronoandrew43@gmail.com | +254 769 570 325 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

An experienced Software Engineer with a proven track record in designing, developing and deploying full stack web applications and ERP solutions to clients. Proficient with Django, React, Next.js, Laravel, the Frappe Framework and ERPNext, and Database Management Systems (DBMS), such as PostgreSQL and MySQL. Proven ability to provide scalable solutions. Skilled in managing the full software development lifecycle from database design, optimization, and backend architecture to frontend development, deployment, and Linux server administration. Strong background in Python automation, developing scripts and workflows that eliminate repetitive tasks, streamline business processes, and improve operational efficiency. Currently working as a full-time freelance software engineer, delivering reliable, production-ready solutions tailored to client needs.

SKILLS

- **Languages:** Python, JavaScript, PHP
- **Frontend:** React.js, Next.js, Angular, Vue.js, Tailwind CSS
- **Backend:** Django, Laravel, REST APIs
- **Databases (DBMS):** PostgreSQL, MySQL, MariaDB, Microsoft SQL Server (design, optimization, indexing)
- **ERP Systems:** Frappe Framework, ERPNext
- **System Administration:** Linux (Ubuntu), Nginx, Apache, Git, GitHub, Docker, CI/CD, SSH
- **Automation:** Python scripting, web scraping, task scheduling, data processing, ETL
- **Data Tools:** Pandas, NumPy, Power BI, Tableau, Excel

PROFESSIONAL EXPERIENCE

Independent Software Engineer, ERP Developer & IT Consultant — Freelance / Remote
(2024 — Present)

Develop and publish full stack web applications and ERP systems for clients.

Personalize ERPNext (Frappe Framework) for finance, inventory, HR, CRM & workflow automation.

Create REST APIs and connect with third party services .

Create and maintain databases (PostgreSQL, MySQL, MariaDB), design schemas, optimize and back up the databases.

Design, deploy and maintain Linux servers including CI/CD and hosting setup with Nginx/Apache.

Develop Python automation scripts for reporting, data processing, and workflow optimization.

Manage entire project life cycle from requirements to deployment and support.

Software Engineer — VortexCraft Software Limited(*May 2023 — August 2023*)

Built full stack applications with Django and React.js.

Built REST APIs and integrated frontend-backend systems

Optimized database queries and application performance

Conducted code review, testing and debugging

Collaborated with Agile teams to complete project milestones.

Web Development Intern — UpTechWorld

May 2022 — August 2022

Developed responsive Frontend Interfaces and integrated Backend Services

Designed reusable UI components with the latest JavaScript frameworks

Optimization of the website performance and load speed.

Helped test and debug, and implemented features.

SELECTED PROJECTS

Siren K.A Andrew Engineering — Civil Engineering & Infrastructure Supervision Website (Client Project)

Professional website for a civil engineer and infrastructure supervisor, showcasing the transition from architectural concepts to site-specific structural execution.

GitHub: <https://github.com/Andrew-comm/siren-andrew-engineering>

Live Demo: <https://siren-andrew-engineering.netlify.app/>

Cherono J. & Company Advocates — *Client Project (Law Firm Website)*

Developed and designed a professional corporate website highlighting legal expertise, corporate profile and community service. Developed responsive UI with performance and professional branding.

GitHub: github.com/Andrew-comm/Cherono-J.-Company-Advocates

Live Demo: cherono-advocates.netlify.app

Nyalil Tree Nursery — Environmental Initiative Website

Client website built for a Kenyan tree nursery promoting reforestation and environmental conservation.

Technologies: Nextjs, CSS

GitHub: <https://github.com/Andrew-comm/Nyalil-Tree-Nursery>

Live Demo: <https://nyalil-tree-nursery.netlify.app/>

Trandic Beauty Parlour — Client Project (Salon Management System)

ERPNext-based management system for a beauty parlour, covering appointment scheduling, inventory, and client records.

Tech Stack: ERPNext, Frappe Framework, MariaDB

MarketHub — E-Commerce Platform

Designed a safe e-commerce platform that integrates payment, user authentication, product catalog and shopping cart. Developed efficient RESTful APIs and implemented PostgreSQL for data storage and retrieval.

Tech Stack: Django, React.js, PostgreSQL

GitHub: github.com/Andrew-comm/MarketHub

Live Demo: markethub-347n.onrender.com

SwiftSale — Point-of-Sale (POS) System

Robust POS system enabling businesses to manage inventory, process transactions, and track sales analytics.

Technologies: Django, PostgreSQL

GitHub: <https://github.com/Andrew-comm/SwiftSale>

Live Demo: <https://swiftsale.onrender.com/>

EDUCATION

Bachelor of Science in Software Engineering

Multimedia University of Kenya | 2020 – 2024

Second Class Honours (Upper Division)

Kenya Certificate of Secondary Education (KCSE)

Kabarnet High School | 2016 – 2019

Grade: A- (78 Points)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Google IT Automation with Python — Google Coursera
- Google IT Support Professional Certificate — Google Coursera
- IBM Data Science Professional Certificate — IBM

PROFESSIONAL MEMBERSHIP

International Association of Engineers (IAENG) — Member No. 561537

Full member, and eligible to attend IAENG conferences, attend IAENG publications, and join international professional engineering activities.

REFEREES

Wilson Kibet Kipkoech — Solutions Architect, Safaricom PLC

Phone: 0706 244 585 | Email: wilsonkibet189@gmail.com

Hoseah Kiptoo — Atlassian Engineer, Relational Financial Services East Africa

Phone: 0758 769 501 | Email: hoseahkiptoo201@gmail.com
